## **A note from Cynthia...**

Designing a musical freestyle for dressage can be a very time consuming and frustrating experience; investing hours of listening to and buying music, purchasing equipment, and learning the computer technology necessary. Finally, it can take years to learn how to design and edit the music in a way that is creative while complying with the USEF rules and USDF/FEI requirements.

Almost two decades of experience, I produce professional freestyles. I can select music that suits your horse, or use your selections, and match the music's tempo to your horse's gaits. I can design your custom freestyle at the level of your performance as well as create interesting and judge pleasing choreography. When I say "design," I mean I take musical phrases and place them where you will be riding your required movements. Freestyles are not just playing music while the rider does the required movements. The original music will be rearranged so that it matches the movements you will be performing in the 20 x 60 dressage arena.
